Some Random Landscape Thoughts

We continue to see triple digit weather in the current drought. In this profession I'm asked by home and business owners what plants can survive the central valley heat. As I have the privilege to do design builds I know what plants to recommend to the home owner that can withstand the drought and keep your yard looking beautiful year round. For those of you that have dead or dying plants, here is a list of plants that can make it through the hot summers.

- Katrinus Deluxe
- Aussie Flat Bush
- Buddleia Pugster Blue
- Hypericum Kalmianun "Deppe" Sunny Boulevard
- Lippia Pink Kurapia
- Pyracomeles Juke box
- Penstemon
- Rosa Flower Carpet Pink Supreme
- Rockrose Cistus
